Rosanna 'Pinkie'

FCC, RHS

A magnificent blush-white of exquisite conformation and ultraheavy substance, Rosanna 'Pinkie' FCC, RHS has proven invaluable in the breeding of quality Cymbidiums. Because of its ability to impart traits of amazing form and superior substance, Rosanna 'Pinkie' is considered to be one of the finest stud plants in existence. Parentage of Rosanna 'Pinkie' is Alexanderi 'Westonbirt' FCC, RHS x Kittiwake 'Holford' AM, RHS.

The Dos Pueblos Rosanna 'Pinkie' is from the original tetraploid clone of the Rothschild collection at Exbury. It is this cultivar which parented such meritorious crosses as Balkis, Imbros, Inamorata, Ispahan, Kairouan and Nam Khan.

To this list of memorable progenies should be added Ann Green, Etta Barlow, Judy and Nikkietta - recent hybridizations, but much awarded 'Pinkie' hybrids of Dos Pueblos origination. Mention should also be made of the superb results being obtained from the Dos Pueblos remake of Balkis.

4033 JUDY (Rosanna 'Pinkie' FCC, RHS x Rosalita 'Dos Pueblos') With this fine pink, fullness of flower and superior substance may be attributed to Rosanna 'Pinkie'. Vigorous growth and free spiking habit may be attributed to Rosalita 'Dos Pueblos', a prolific diploid of *Delaysia* x *insigne* parentage. True to *insigne* tradition, plants of Judy provide tall, erect spikes which carry their many flowers high above the foliage. 'Fiesta', 'Gaiety', 'Noma' and 'Diosa' are among the awarded cultivars of *Dos Pueblos* origination.

10"-14" tubs, \$25, \$35 and \$50

JUDY 'DIOSA' HCC, AOS; HCC, ODC; B, CSA. Cross 4033.

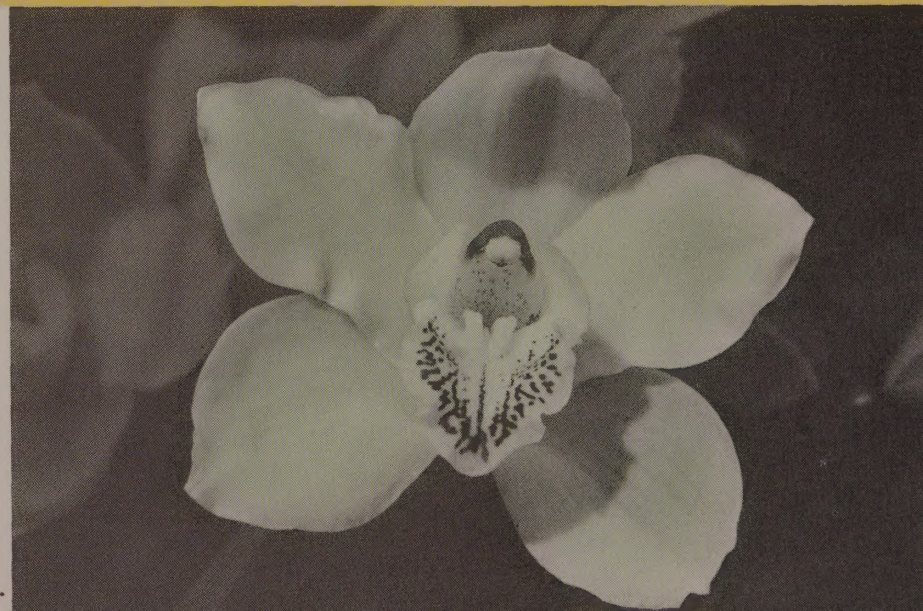

ROSANNA 'PINKIE'
Page 3

4035 NIKKIETTA (Miretta 'Dos Pueblos' x Rosanna 'Pinkie' FCC, RHS) This cross is recommended for both the commercial man and those of you seeking awards. For description of NIKKIETTA, refer to cross 5097 on page 6.

7"-9" pots, \$20 and \$30; 10"-14" tubs, \$25, \$35 and \$50

4036 ANN GREEN (Rosanna 'Pinkie' FCC, RHS x Babylon 'Castle Hill' FCC, RHS) Cascades of pink tetraploids of wondrous form and superb substance are forthcoming from this combination. For description of this magnificent hybrid, refer to cross 6121 on page 7.

10"-14" tubs, \$25, \$35 and \$50

NIKKIETTA 'JANICE' HCC, AOS; HCC, ODC. Crosses 4035 and 5097.

4037 VIRGINIA KNIGHT (eburneo-Lowianum 'concolor' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) Golden and lemon yellows, whites and tones of ivory - including a number of concolors - are produced by this fine Rosanna 'Pinkie' hybrid. A diploid yellow, eburneo-Lowianum 'concolor' produces a prodigious number of spikes. Most important, however, is the fact that this cultivar sired the renowned tetraploid, Alexanderi 'Westonbirt', as well as, the lovable, golden triploid, Miniver 'Maxine'.

7"-9" pots, \$15 and \$20; 10"-14" tubs, \$25 and \$35

4077 BALKIS (Alexanderi 'Westonbirt' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) For exhibition, breeding or top quality bloom sales, Balkis is second to none! For description of this superb hybrid, refer to cross 6085 on page 7.

10"-14" tubs, \$25, \$35 and \$50

4103 ETTA BARLOW (Rosanna 'Pinkie' FCC, RHS x Balkis 'Perfection') Because of the sensation created by the magnificent whites and blush-whites of Etta Barlow, flowers of this fine cross were featured on the cover of the Australian edition of the *Reader's Digest* of September, 1960. The result of combining two fabulous parents, Rosanna 'Pinkie' and Balkis 'Perfection', offspring of this cross are truly of amazing form and substance. A tetraploid, Etta Barlow is an excellent selection for the hybridizer or connoisseur.

10"-14" tubs, \$25, \$35 and \$50

5040 LUCY BROWN (Rosanna 'Pinkie' FCC, RHS x Carisona 'Glendessary') Our well-known cross of Rosarita was parented by Carisona 'Glendessary'. Bumper crop productivity and dynamic vigor are among the attributes of this fine diploid. Free flowering, each spike bears 18 to 25 shapely, heavy blooms of clear, dark rose. We have combined this highly respected diploid stud with the superb Rosanna 'Pinkie' so as to achieve an abundance of top quality pinks and tones of rose. As with Rosarita, a number of reds may also be expected.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5042 ANNIE HOLLISTER (Rosanna 'Pinkie' FCC, RHS x Claudette 'Invicta' AM, RHS) From 18 to 28 handsome flowers of deep green are borne on each of Claudette 'Invicta's' many spikes. This fine cultivar is the same proven diploid breeder used in the original cross of Miretta and Claudona, two world celebrated hybrids from which a number of today's better greens have resulted. Mated with Rosanna 'Pinkie', choice yellows and greens, along with tones of peach and apricot are certain.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5043 LOS CANALINOS (Rosanna 'Pinkie' FCC, RHS x Enid Haupt) Enid Haupt is a showy, clear yellow diploid valued for quality cut flower production and, also, for highlighting our displays at the various orchid shows. This select cultivar bears a prodigious number of lofty spikes, heavily laden with large, handsomely proportioned blooms of long lasting substance. Combined with Rosanna 'Pinkie', fine yellows, pinks and pleasing polychromes result.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5053 DANIEL HILL (Rosanna 'Pinkie' FCC, RHS x Sicily 'Lucy') An early flowering diploid, Sicily 'Lucy' yields countless spikes, each bearing from 15 to 25 large, well-spaced blooms of clear apple-green. Crossed with Rosanna 'Pinkie', large, outstanding yellows, blush-whites and tints of green are provided. A good percentage of exhibition material, as well as, early, superior flower stock may be anticipated.

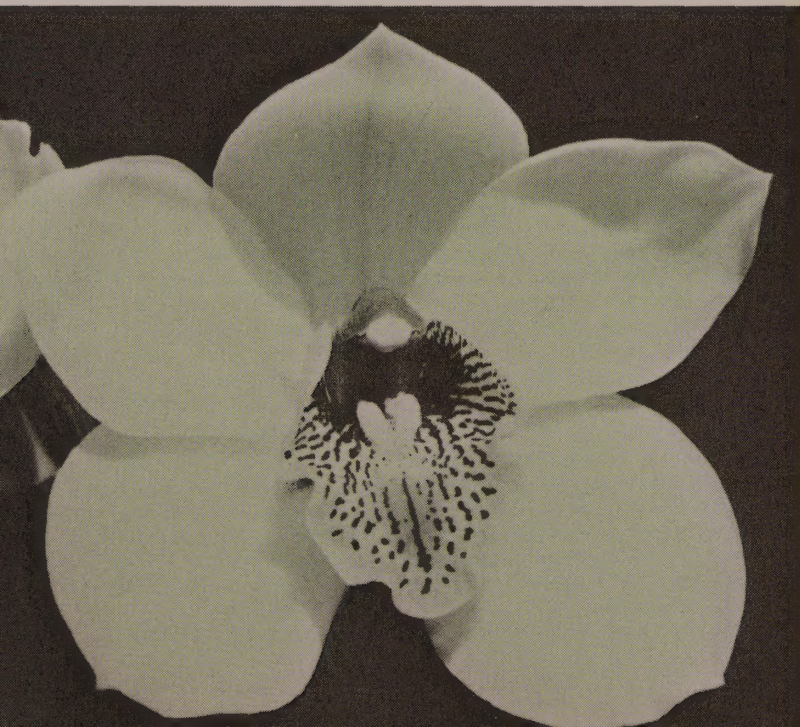

7"-9" pots, \$15 and \$20; 10"-14" tubs, \$25 and \$35

5054 GIBRALTAR (Gottianum x Rosanna 'Pinkie' FCC, RHS) A primary cross of eburneum x insigne, Gottianum is a diploid F₁ hybrid, which, in collaboration with the tetraploid stud, Rosanna 'Pinkie', may be counted upon to provide quality flowers of blush-white. Our cultivar of Gottianum is strong growing, free flowering and an early bloomer. Its flowers are large and of handsome form, blush-white, with a prominent lip, boldly marked with crimson.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

Write for your free copy of
GUIDE TO SUCCESSFUL
CYMBIDIUM CULTURE

5063 MARIAN STORKE (Apollo 'Exbury' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) Choice yellows and handsome polychromes are certain to result from this union of two proven breeders. Apollo 'Exbury' is recognized as the world's finest yellow diploid for stud purposes. Kinglet, Sayonara and Lump O'Gold are among its progeny. Even to the non-breeder, Apollo 'Exbury' is a prized possession as it produces long, arching spikes of 15 to 20 large, showy blooms with beautifully marked lips.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5082 ROYAL DUKE (Pearl 'magnificum' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) Pearl 'mag's' influence as a parent can not be overemphasized. It is noted for transmitting traits of strong growth, massive spike habit and handsome, boldly marked lips to its progenies. Mated with Rosanna 'Pinkie', vigorous, very prolific tetraploid pinks of handsome conformation and heavy substance are awaited.

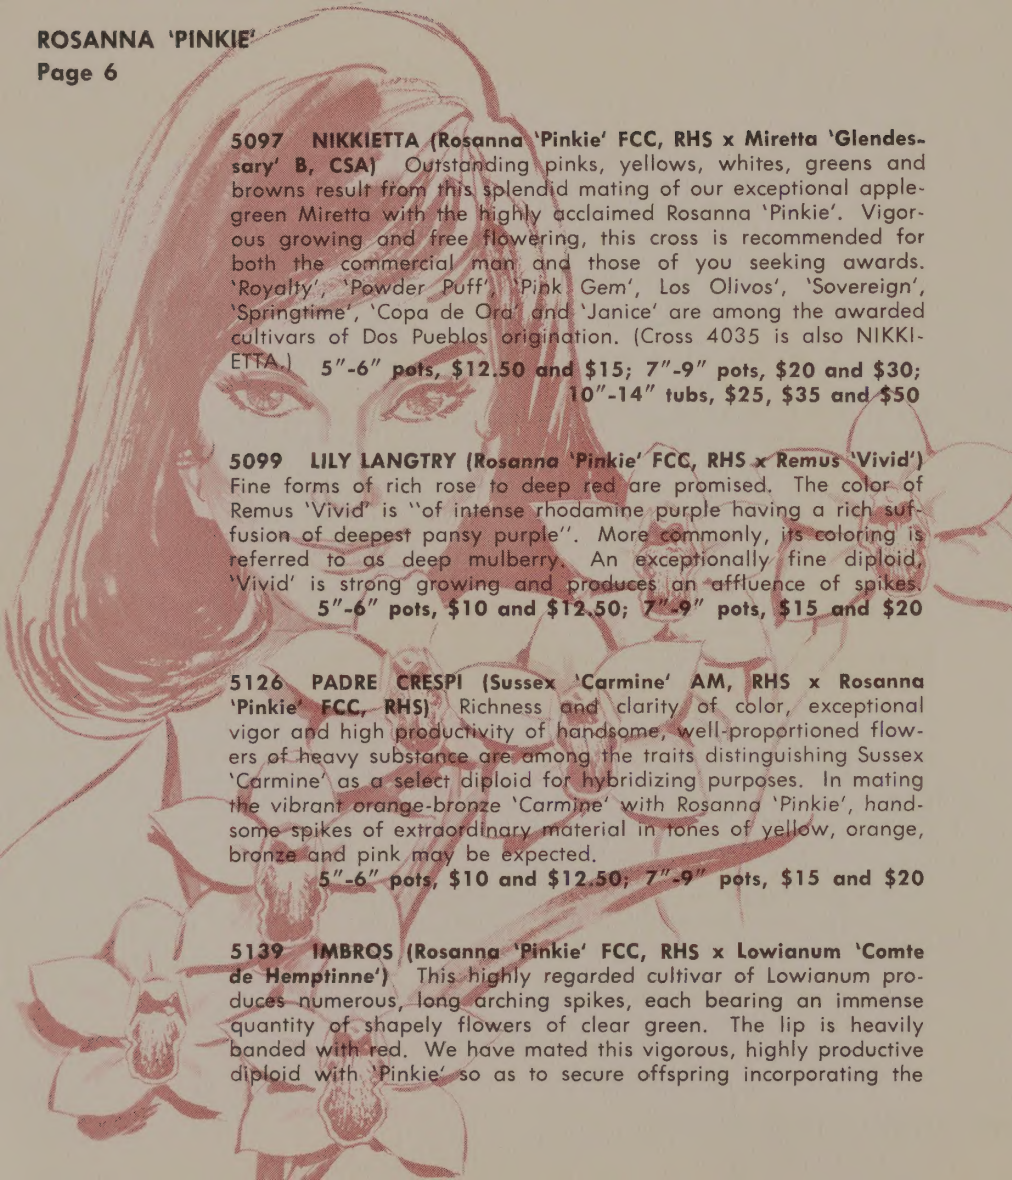

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5087 Rosanna 'Pinkie' FCC, RHS x Nubium 'Exbury' An ideal diploid for hybridizing purposes, Nubium 'Exbury' is robust growing and produces numerous, long arching spikes of 15 to 22 well-shaped, heavy blooms of lovely brownish-red. The striking lip is heavily banded with red. In combining the outstanding traits of this exceptional cultivar of Nubium with Rosanna 'Pinkie', we expect the offspring to yield many lofty spikes bearing multitudes of well-formed, heavy flowers. Rose and bronze-red tones to prevail.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5088 ANN GREEN (Babylon 'Carpentier' x Rosanna 'Pinkie' FCC, RHS) Exquisite tetraploid pinks are provided by this fine cross. For description of this exceptional hybrid, refer to cross 6121 on page 7.

7"-9" pots, \$20 and \$30; 10"-14" tubs, \$25, \$35 and \$50

5097 NIKKIETTA (Rosanna 'Pinkie' FCC, RHS x Miretta 'Glendessary' B, CSA) Outstanding pinks, yellows, whites, greens and browns result from this splendid mating of our exceptional apple-green Miretta with the highly acclaimed Rosanna 'Pinkie'. Vigorous growing and free flowering, this cross is recommended for both the commercial man and those of you seeking awards. 'Royalty', 'Powder Puff', 'Pink Gem', 'Los Olivos', 'Sovereign', 'Springtime', 'Copa de Oro' and 'Janice' are among the awarded cultivars of Dos Pueblos origination. (Cross 4035 is also NIKKIETTA.) **5"-6" pots, \$12.50 and \$15; 7"-9" pots, \$20 and \$30; 10"-14" tubs, \$25, \$35 and \$50**

5099 LILY LANGTRY (Rosanna 'Pinkie' FCC, RHS x Remus 'Vivid') Fine forms of rich rose to deep red are promised. The color of Remus 'Vivid' is "of intense rhodamine purple having a rich suffusion of deepest pansy purple". More commonly, its coloring is referred to as deep mulberry. An exceptionally fine diploid, 'Vivid' is strong growing and produces an affluence of spikes. **5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20**

5126 PADRE CRESPI (Sussex 'Carmine' AM, RHS x Rosanna 'Pinkie' FCC, RHS) Richness and clarity of color, exceptional vigor and high productivity of handsome, well-proportioned flowers of heavy substance are among the traits distinguishing Sussex 'Carmine' as a select diploid for hybridizing purposes. In mating the vibrant orange-bronze 'Carmine' with Rosanna 'Pinkie', handsome spikes of extraordinary material in tones of yellow, orange, bronze and pink may be expected. **5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20**

5139 IMBROS (Rosanna 'Pinkie' FCC, RHS x Lowianum 'Comte de Hemptinne') This highly regarded cultivar of Lowianum produces numerous, long arching spikes, each bearing an immense quantity of shapely flowers of clear green. The lip is heavily banded with red. We have mated this vigorous, highly productive diploid with 'Pinkie' so as to secure offspring incorporating the

outstanding features of both parents. Peach, pink, bronze, green - a variety of colors may be anticipated.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5143 Purpureum 'delicata' x Rosanna 'Pinkie' FCC, RHS Strong spikes of captivating pinks and blush-whites may be expected of this mating. Vigorous diploid of good spike habit, Purpureum 'delicata' is an abundant provider of graceful, clear pinks of heavy substance.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6050 Rosanna 'Pinkie' FCC, RHS x Candeur 'Dos Pueblos' Amazingly vigorous and productive of quality whites, it is difficult to conceive of a diploid more desirable for hybridization than our select cultivar of Candeur. It is rare for a diploid to produce flowers as large and as fine of form and substance as does Candeur 'Dos Pueblos'. From this mating, with the sensational 'Pinkie', we have high hopes of obtaining offspring fabulously productive of aristocratic whites and blush-whites.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6051 Edzell 'John Linford' AM, RHS x Rosanna 'Pinkie' FCC, RHS Edzell 'John Linford' is loved for its enticing flowers of deep red. Vigorous and free blooming, each spike of this handsome diploid bears 14 to 20 shapely, well-formed reds. Clear tones of pink, rose and red will dominate in this mating with 'Pinkie'.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6062 Rosanna 'Pinkie' FCC, RHS x Remus 'Sunset' AM, RHS This is a most desirable cross for those of you seeking quality material in out-of-the-ordinary colorations of peach, apricot, copper and orange. Attractive spikes of this cross are loaded with flowers and have a tendency to bloom early in the season. Flowers of the diploid Remus 'Sunset' are of lively copper-rose. The full lip is boldly marked.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6082 Cremona 'Black Prince' FCC, RHS x Rosanna 'Pinkie' FCC, RHS A well-known diploid parent, each spike of Cremona 'Black Prince' yields 18 or more eye-catching flowers of rich bronze. The bold, deeply margined lip of 'Black Prince' may be expected to dominate in the copper and bronze descendants anticipated of this favorable mating with Rosanna 'Pinkie'.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6085 BALKIS (Alexanderi 'Westonbirt' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) The pinnacle of perfection! Balkis is a super-excellent tetraploid resulting from the mating of two great tetraploid parents. Large, exquisite whites and blush-whites of excellent conformation and ultraheavy substances are abundantly provided by this cross. For exhibition, breeding or top quality bloom sales, Balkis is second to none! 'Compacta', 'Snowflake', 'Mt. Evans', 'Pink Ballet', 'Mt. Massive', 'Phyllis', 'Madonna', 'Ermine', 'Nevaso', 'Cresta Blanca', and 'Sheba' are among the awarded cultivars of Dos Pueblos origination. (Cross 4077 is also BALKIS.)

5"-6" pots, \$12.50 and \$15; 7"-9" pots, \$20 and \$30

6088 Rosanna 'Pinkie' FCC, RHS x Rosinante AM, RHS From 16 to 18 large, majestic diploid pinks of tetraploid-like form and substance are borne on each of the many spikes produced by Rosinante AM. Last season our cross of Rosinante AM with Alexanderi 'Westonbirt' flowered, rewarding us with exquisite blooms of blush. With this cross, using the fuller, exhibition type 'Pinkie' as seed parent, even greater expectations are in order.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6121 ANN GREEN (Babylon 'Castle Hill' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) Cascades of pink tetraploids of wondrous form and superb substance, produced on towering spikes, are forthcoming from this combination. We have no hesitancy in recommending this cross to those of you seeking excellent material for exhibition, breeding or commercial cut flower sales. 'Gigantea', 'Nadina', 'Pink Splendor', 'Debutante', 'Skippy', 'Grandeur' and 'Contention' are among the awarded cultivars of Dos Pueblos origination. (Crosses 4036 and 5088 are also ANN GREEN.)

5"-6" pots \$12.50 and \$15; 7"-9" pots, \$20 and \$30

BALKIS 'NEVASO' HCC, AOS; HCC, ODC. Crosses 4077 and 6085.

6122 Golden Hinde x Rosanna 'Pinkie' FCC, RHS Golden Hinde is a vigorous, free flowering diploid, each spike having 16 to 22 shapely, heavy flowers of clear, golden yellow. This combination of 'Pinkie's' exceptional qualities and the prolific production, vigorous growth habit of this select Golden Hinde promises triploid offspring of remarkable potentialities. Yellows, blush-whites and lovely polychromes to result.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

BALKIS 'PERFECTION'

Balkis 'Perfection'

Balkis 'Perfection' is an exquisite white tetraploid of splendid form and great substance. The well-balanced flowers measure 4½" in spread and are handsomely accentuated by the beautiful, full lip which has a solid pink apex.

Balkis 'Perfection' is of Rosanna 'Pinkie' x Alexanderi 'Westonbirt' parentage. As Rosanna 'Pinkie' is also a direct descendant of Alexanderi 'Westonbirt', in Balkis 'Perfection' are concentrated many of the superb characteristics of this fabulous stud.

'Perfection' has the ability to transmit traits for elegant, broad lips of lovely coloration, along with exceptional vigorousness, fine spike habit, superb form and strong substance. With such hybrids as Etta Barlow, Karen Cameron, Desiree Elizabeth A'Logann and the Dos Pueblos strains of San Francisco and Simla to its credit, Balkis 'Perfection' has demonstrated its vast importance as a parent.

If scientific advances are
an indication of maturity,
Dos Pueblos is the
orchid world's Methuselah.

4087 SAN FRANCISCO (Blue Smoke 'Green Meadow' x Balkis 'Perfection') A terrific triploid, the cross of San Francisco is responsible for a goodly number of today's award winners, particularly greens! 'Floriferousness', 'Buttercup', 'Twin Peaks', 'Maiden Lane', 'Top of the Mark', 'Supreme', 'Daybreak', 'Galaxy', 'Angelica', 'Lime Light', and 'Old Toasty' are among the award winners of Dos Pueblos origination. Robust growers, the offspring are extravagant producers of excellent yellows, pinks, greens, whites and browns, ideal for quality cut flower sales or for exhibition.

10"-14" tubs, \$25, \$35 and \$50

4103 ETTA BARLOW (Rosanna 'Pinkie' FCC, RHS x Balkis 'Perfection') A quality-plus tetraploid of superb form and substance. For description of this fine cross, refer to page 4.

10"-14" tubs, \$25, \$35 and \$50

4107 SIMLA (Dante FCC, RHS x Balkis 'Perfection') Vigorous, highly prolific offspring yielding attractive blush-whites of top form and strong substance are provided by this outstanding hybrid. The awarded Dante is free flowering, each spike bearing 14 to 22 spreading, well-formed, diploid pinks.

7"-9" pots, \$15 and \$20; 10"-14" tubs, \$25 and \$35

4109 KAREN CAMERON (Nam Khan FCC, RHS x Balkis 'Perfection') Bred from two distinguished tetraploid parents, gorgeous blush-whites of rotund conformation and super substance are borne on sturdy, erect spikes of this exceptional hybrid. This is an ideal selection for the hybridizer or connoisseur.

10"-14" tubs, \$25 and \$35

SAN FRANCISCO 'SUPREME'

AM, AOS; AM, ODC; S, CSA; CC, CSA; Best of Show. Cross 4087.

5095 DESIREE A'LOGANN (Babylon 'Carpentier' x Balkis 'Perfection') A distinguished cultivar, Babylon 'Carpentier' parented such beloved hybrids as Crescendo, Fantasia and the excellent remake of Tinsel. Production-wise, 'Carpentier' yields a greater number of blooms per spike than does the more celebrated variety of 'Castle Hill'. From this union with our magnificent Balkis 'Perfection', strong, long arching spikes bearing cascades of attractive pinks are provided. A tetraploid x tetraploid combination, we recommend this exceptional hybrid to the commercial man, the hybridizer and the connoisseur.

7"-9" pots, \$15 and \$20; 10"-14" tubs, \$25 and \$35

5128 PRINCE CHARLES (Balkis 'Perfection' x Pauwelsii 'Comte de Hemptinne' FCC, RHS) With our superfine Balkis 'Perfection' as seed parent and the remarkable, very vigorous, extravagantly productive tetraploid stud, Pauwelsii 'Comte de Hemptinne' as pollen parent, we contemplate a remake of Prince Charles far superior to the original cross. Tall arching sprays, beautifully laden with well-proportioned, heavy blooms, many bearing the spectacular lip of the Pauwelsii parent, may be expected to prevail. Rich shades of pink and rose, along with tones of peach, apricot and yellow are anticipated.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5129 ARABIAN NIGHTS (Sussex 'Carmine' AM, RHS x Balkis 'Perfection') In this hybrid, we have combined the exceptional Balkis 'Perfection' with the vibrant orange-bronze diploid, Sussex 'Carmine' to secure a glorified version of Arabian Nights. Balkis 'Perfection' imparts superior flower qualities along with robust growth habit to its offspring. Sussex 'Carmine' transmits characteristics of generous flower production and dynamic vigor. From this combination, handsome, well-aligned spikes bearing many lovable blooms of yellow, bronze, apricot and pink are awaited.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5133 SANTA YNEZ (Balkis 'Perfection' x Rosette 'Glendessary') Rosette 'Glendessary' is robust growing and a prolific provider of large, spreading diploid flowers of lovely yellow-green. Combined with the prominent qualities of Balkis 'Perfection', large, handsomely proportioned, heavy blooms of yellow, white, cream and ivory are forthcoming.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6098 ROSA DEN (Rosalita 'Dos Pueblos' x Balkis 'Perfection') Rosalita 'Dos Pueblos' shows a floriferousness seldom exceeded in Cymbidiums, with almost every pseudobulb flowering. The spike carries 20 or more well spaced blooms of luscious pink raspberry, greatly emphasized by the wide red margin on the lip. Lovely pinks of splendid proportions and heavy substance are to come from this mating with our highly respected cultivar of Balkis.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6111 Edzell 'John Linford' AM, RHS x Balkis 'Perfection' Vigorous and free flowering, each spike of Edzell 'John Linford' bears from 14 to 20 heavy, enticing flowers of deep red. We have combined this lovely red diploid with the exquisite qualities of the famed Balkis 'Perfection' so as to obtain delightful, full forms of rose to red, heavy in substance and high in productivity.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6117 Susa 'Dos Pueblos' x Balkis 'Perfection' Dark colorations of beautiful form and great substance are sought from this mating. Vigorous and prolific, Susa 'Dos Pueblos' is a shapely, pretty diploid of deep, dark reddish-brown. In combining this handsome ultradark diploid with the fabulous traits of our proven Balkis 'Perfection', we are assured of highly colored material of unsurpassing qualities.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

Captivating Greens

4149 NANDI (Shiraz 'Mary Bea' x Miretta 'Glendessary' B, CSA)

Greens predominantly - and yellows of handsome form, heavy substance and immense size are produced in great quantities on lofty, long arching stalks by this fine, vigorous triploid. A showy specimen, ideal for highlighting exhibitional displays or for top quality cut flower production.

5"-6" pots, \$10 and \$12.50;

7"-9 pots, \$15 and \$20;

10"-14" tubs, \$25, \$35 and \$50

BLUE SMOKE 'GREEN MEADOW' (Lowianum 'Pitts' x Mirabel FCC,

RHS) Long, arching sprays, each bearing 15 to 20 clear, rich greens of heavy substance and handsome proportions are produced in profusion by this well-known diploid hybrid. The lip is handsomely, boldly marked with deep red. A delightful, eye-catching addition to one's collection.

\$50 per bulb

CANDEUR 'DOS PUEBLOS' - Exceptionally vigorous, highly productive diploid parent of crosses: 6042 - page 20, 6047 - page 13, 6050 - page 6 and 6052 - page 23.

BALKIS 'SNOWDON'

Balkis 'Snowdon'

Exceptionally vigorous and productive, Balkis 'Snowdon' is of fine spike habit, each bearing 14 to 18 snow-white, almost concolor flowers of superb form and substance.

Because of its many fine, tetraploid qualities and ability to transmit clarity of color to its progeny, Balkis 'Snowdon' was incorporated into our hybridization program in 1955. Our relatively new, respected crosses of Naples, Rosa Den, Balshina and the Dos Pueblos strain of Lillian Stewart, are among its offspring.

As Alexanderi 'Westonbirt' is both parent and grandparent of Balkis 'Snowdon', a concentration of the superb traits of Alexanderi 'Westonbirt' are to be found in this fine cultivar.

For enjoyment for years to come,
invest in Dos Pueblos Cymbidiums
—they're tops!

5041 LILLIAN STEWART (Balkis 'Snowdon' x Carisona 'Glendessary') Clarity of color is a prime objective in this remake of the popular Lillian Stewart. The very productive, deep rose Carisona 'Glendessary' was again selected as the pollen parent with Balkis 'Snowdon' chosen to carry the pod. By using the superb, clear 'Snowdon' cultivar, we hope to alleviate the tendency towards 'striped' progeny which is so prominent in the original cross. Highly productive, first-class pinks of clear coloration borne on sturdy, long arching spikes may be anticipated of this splendid re-creation.

**5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20;
10"-14" tubs, \$25 and \$35**

5052 NAPLES (Balkis 'Snowdon' x Sicily 'Lucy') Large, elegant whites and golden yellows that retain their coloring throughout the season are produced in profusion from this hybridization. The broad lip, exceptional form and terrific substance of the magnificent tetraploid Balkis 'Snowdon' predominate in the offspring of this fine cross.

**5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20;
10"-14" tubs, \$25 and \$35**

5068 ROSA DEN (Rosalita 'Dos Pueblos' x Balkis 'Snowdon') Parent of our successful crosses of Judy and Rayme, Rosalita 'Dos Pueblos' is an attention-commanding diploid of pink raspberry, further characterized by its outstanding lip which is almost entirely of deep beet-root red. The individual blooms are large, spreading and of tremendous substance. This cultivar is most vigorous growing and produces an affluence of spikes, each carrying 20 or more well-proportioned flowers. Combined with the elite traits of Balkis 'Snowdon', we are assured of a very vigorous progeny, highly productive of clear pinks of full proportions and heavy substance.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5136 BALSHINA (Shina Black x Balkis 'Snowdon') An abundance of large, intense yellows and whites of lovely proportions and great substance may be expected of this mating. Diploid

parent of our exceptional remake of York, our Shina Black parent is very vigorous and prolific of countless spikes, each bearing from 18 to 25 spreading, well-proportioned blooms of citron green. Combined with the superb characteristics of our Balkis 'Snowdon', topmost cut flower material, as well as, exhibitionals may be anticipated.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5142 Purpureum 'delicata' x Balkis 'Snowdon' A vigorous diploid of good spike habit, Purpureum 'delicata' is an ample provider of graceful, clear pinks of long lasting substance. From this hybridization we look forward to a radiant, clear pink progeny, possessive of the magnificent qualities of the Balkis 'Snowdon' and the free spiking, free flowering traits of the choice Purpureum.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6047 Candeur 'Dos Pueblos' x Balkis 'Snowdon' For vast productivity of quality whites, this hybrid is a must! Candeur 'Dos Pueblos' is amazingly vigorous and creative of large, handsomely proportioned whites of great substance. Each of its many, long arching spikes carries 25 to 30 blooms of triploid-like form and substance. It is rare to find a diploid of such wonderful qualities! Combined with the superb characteristics of the Balkis 'Snowdon' parent, only choice material can be forthcoming.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6049 MEM. ROBERT CASAMAJOR (Apollo 'Exbury' FCC, RHS x Balkis 'Snowdon') Clear yellows of wondrous form, large size and exceptional substance are predicted of this mating of two proven studs. One needs only to review the many fine offspring of Apollo 'Exbury' derivation to realize why it is acclaimed the world's finest yellow for breeding purposes. Apollo 'Exbury' is strong growing, providing long arching spikes of 15 to 20 spreading, showy yellows. Its distinctive lip is heavily marked with crimson. Crossed with the tetraploid Balkis 'Snowdon', large clear yellows and pleasing tints of cream to ivory are awaited.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

Miniature Cymbidiums in Colorama

MINIATURES ARE EASY TO GROW. Adjusting to various temperatures, they do well with the cool growing, standard-size Cymbidiums or along with *Phalaenopsis*, *Cattleyas* and other warm growing orchids. These little jewels may be successfully flowered in Florida, Texas and other warm regions where, under ordinary conditions, the standard-size Cymbidiums are often difficult to bloom. **Miniatures may be grown in the home, greenhouse, lathhouse, or incorporated in outdoor plantings** in areas where the temperature does not fall below 28 degrees.

EARLY FLOWERING. The blooming period of Miniatures extends from winter through spring, with many flowering again during the summer months. Because of their **lavish display of festive blooms, diminutive size and weight**, Miniature-flowered Cymbidiums are choice plants for home or office decor. Cut spikes may be fashioned into handsome

table arrangements. Individual blossoms are ideal for boutonnieres, or several may be grouped together to form petite corsages.

PUMILUM HYBRIDS

6149 MINNEKEN (pumilum x Rosalita 'Dos Pueblos') Pinks. A prolific provider of handsome, erect spikes, each carrying from 10 to 20 or more flowers of pastel pink, deep rose, plum or red.
6" pots \$10, \$12.50 and \$15

7031 TOM THUMB (pumilum album x Coronado 'Verde') Lovely, erect spikes of lime, chartreuse, lemon and bronze are produced by this free flowering, free growing improvement of our much awarded, earlier hybrid of Peter Pan.
6" pots \$10, \$12.50 and \$15

7032 MARY PINCHES (pumilum album x Pajaro 'Amarillo') Similar to the wonderful cross of Tom Thumb, this is an excellent selection for those of you desiring the much in demand colors of green and yellow.
6" pots \$10, \$12.50 and \$15

7034 ALICE WILLIAMS (pumilum album x Shina Black) Another fine hybridization to counteract the shortage of quality greens and yellows. As with all of our Miniatures of pumilum breeding, this cross produces multiple growths and numerous, erect spikes.
6" pots \$10, \$12.50 and \$15

Almost 70% of the top awards presented to Miniature Cymbidiums by the American Orchid Society during the 1960-61 flowering

FINLAYSONIANUM HYBRIDS

7057 finlaysonianum x insigne - Rose to plum tones to predominate. Larger growth habit is characteristic of this cross. Foliage is wider, much heavier than hybrids of pumilum parentage. An interesting hybrid because of its novel appearance, as well as, expectations. **5" - 6" pots, \$7.50 and \$10**

7058 finlaysonianum x Balkis 'Montecito' - A unique cross similar to the above, with the exception that the tetraploid, Balkis, rather than a diploid, served as the pollen parent. Rose colorations to originate. **5" - 6" pots, \$7.50 and \$10**

IRIDIFOLIUM HYBRIDS

9116 iridifolium x Anna - Hybrids of iridifolium are attractive growers. Habit of growth is smaller than those of finlaysonianum breeding, larger than Miniatures of pumilum. All iridifolium crosses, which we have seen bloom, have the erect spike habit of the larger, standard-size Cymbidium parents. From this fascinating cross, prolific, dainty whites, yellows and tints of green are expected. **3" pots \$5**

9117 iridifolium x Argonaut - Here again we have combined a highly productive, free spiking white with the handsome, golden-yellow iridifolium. Showy whites and yellow tones to dominate. A number of greens will also result. **3" pots \$5**

9121 iridifolium x Esmeralda AM, RHS - In this cross we have mated two golden-greens. A terrific combination destined to provide countless spikes laden with tiny, jewel-like blossoms of golden-green. **3" pots \$5**

season were given to seedlings of Dos Pueblos origination.

MINIATURE CYMBIDIUM TOM THUMB 'MARY BEA', B, CSA. Cross 7031

**Dos Pueblos Cymbidiums
are easy to grow**

Alexanderi 'Westonbirt'

FCC, RHS

The Cymbidium world owes an enormous debt of gratitude to this illustrious parent whose progeny has become a byword of excellence. Alexanderi 'Westonbirt' FCC, RHS is preeminent not only as an immediate parent, but as a rich source of influence over descendants which are rapidly becoming distinguished as parents in their own right.

An exquisite white of splendid form and superb substance, Alexanderi 'Westonbirt' has been the dominating influence in the obtainment of fine Cymbidiums for almost forty years. Rosanna, Balkis, Bodmin Moor, Joan of Arc, Jungfrau, Samarkand, York, Rosarita, Princess Elizabeth, Swallow and Clare Armstrong are but a very few of its many famed offspring.

ALEXANDERI 'WESTONBIRT' FCC, RHS

104 JUNGFRAU (Alexanderi 'Westonbirt' FCC, RHS x Eagle 'Mt. Shasta') A dependable, indispensable hybrid for our commercial bloom sales, we value this vigorous, free spiking triploid for its exuberant production of quality whites. Jungfrau 'Dos Pueblos' AM, AOS; S, CSA was acclaimed Best Seedling and Best of Show at the 1958 Santa Barbara International Cymbidium Show.

5"-6" pots, \$10 and \$12.50; 10"-14" tubs, \$25 and \$35

251 ROSARITA (Alexanderi 'Westonbirt' FCC, RHS x Carisona 'Glendessary') 'Midnight' - one of the finest reds yet produced, 'Goleta', 'Janet', 'Flare', 'Rayo del Sol', 'Rojo', 'Burgundy' and 'Dos Pueblos' are among the recently awarded clones of our Rosarita. A terrific triploid for profitable cut flower production

or exhibition, plants of Rosarita produce numerous lofty spikes, handsomely laden with pinks and reds of fine qualities.

10"-14" tubs, \$25, \$35 and \$50

4062 MAZATLAN (Nam Khan FCC, RHS x Alexanderi 'Westonbirt' FCC, RHS) Tall, sturdy spikes spectacularly laden with blush-whites of exquisite form and strong substance are trademarks of this exceptional tetraploid. Superb stud material, exhibitionals and excellent cut flower stock are promised. Of Pauwelsii 'Comte de Hemptinne' x Rosanna 'Pinkie' parentage, Nam Khan is noted for its strong, arching spikes of 18 to 24 large, expertly proportioned pinks having broad lips brightly banded with red.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

10"-14" tubs, \$25 and \$35

ROSARITA AM, AOS; AM, ODC; S, CSA; Best of Show. Cross 251.

ROSARITA 'MIDNIGHT' AM, AOS, AM, ODC; HCC, CSA. Cross 251.

Dos Pueblos . . .
the World's Largest Grower
of QUALITY Cymbidiums

4077 BALKIS (Alexanderi 'Westonbirt' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) For exhibition, breeding or top quality bloom sales, Balkis is second to none! For description of this superb hybrid, refer to cross 6085 on page 7.

10"-14" tubs, \$25, \$35 and \$50

5031 VIRGINIA WILLIAMS (Alexanderi 'Westonbirt' FCC, RHS x Rosinante AM, RHS) A number of these seedlings flowered during the past blooming season, rewarding us with large, handsome pinks and blush-whites of excellent proportions and heavy substance. Vigorous triploids, the spikes are tall, lifting their flowers high above the foliage. A wise selection for the commercial man, award winning forms may also be expected.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5034 ROSARIO (Rosette 'Glendessary' x Alexanderi 'Westonbirt' FCC, RHS) A prolific diploid of Altair x Pearl parentage, Rosette is an extravagant provider of large, spreading blooms of lovely yellow-green. Crossed with the influential Alexanderi 'Westonbirt', yellows, whites and tints of cream and ivory are expected to prevail. Robust growing, the progeny should be very productive of large blooms of heavy substance.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

5035 YORK (Shina Black x Alexanderi 'Westonbirt' FCC, RHS) In this remake of a fine English hybrid, we have used our select Shina Black as seed parent. According to all reports, this cultivar is proving to be a more highly desirable diploid breeder than the Shina Black used in the original cross. Very vigorous, our Shina Black is highly productive of numerous spikes, each bearing from 18 to 25 large and spreading, well-proportioned blooms of citron green. This cross promises tall, sturdy spikes, richly productive of

BALKIS 'COMPACTA'

AM, AOS; AM, ODC; S, CSA; Best of Show. Crosses 4077 and 6085.

yellows and whites, suitable for quality cut flower sales, as well as, for exhibition.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5051 JEAN CELESTE (Alexandri 'Westonbirt' FCC, RHS x Sicily 'Lucy') Large, early flowering whites and "fade resistant" clear yellows of heavy substance are originating from this mating. The triploid progeny may be expected to be a glorification of Alexandri 'Westonbirt' with color breakdown approximately half white and half yellow. A most profitable hybrid for the commercial man.

**5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20;
10"-14" tubs, \$25 and \$35**

5066 NICOLAS DEN (Alexandri 'Westonbirt' FCC, RHS x Adelma 'Shangri la' B, CSA) Adelma 'Shangri la' is a lavish provider of large, handsomely proportioned diploid blooms of lovely chateaux yellow. Flowering spikes of 'Shangri la' are most attractive, having from 15 to 19 pastel blooms, well-aligned on the individual stalks. Mated with the very influential Alexandri 'Westonbirt', distinguished whites and tints of green are forthcoming.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5067 RAYME (Rosalita 'Dos Pueblos' x Alexandri 'Westonbirt' FCC, RHS) With insigne being an immediate ancestor of both parents, it is little wonder that tall, erect spikes, heavy productivity and vigorous growth are among the virtues of this happy mating. Handsome, well-proportioned pinks and blush-whites of heavy substance are produced in abundance. A goodly number of the triploid offspring may be expected to inherit the outstanding lip of Rosalita, which is almost entirely of deep beet-root red.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5074 MARISA (Sussex 'Carmine' AM, RHS x Alexandri 'Westonbirt' FCC, RHS) Vigorous growing, the brightly colored, orange-bronze diploid, Sussex 'Carmine' is a copious provider of blooming spikes, each bearing a multitude of shapely blooms of heavy substance. Mated with the tetraploid Alexandri 'Westonbirt', we anticipate noteworthy results in a wide range of color: yellow, bronze, apricot and orange.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6030 Alexandri 'Westonbirt' FCC, RHS x Prince Charles Strong spikes, well-laden with pleasingly plump pastel pink tetraploids are assured from this mating with 'Westonbirt'. A tetraploid of Balkis x Pauwelsii parentage, Prince Charles is known for its productivity of handsome, sturdy spikes bearing numerous well-balanced blooms of superb substance.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6032 Alexandri 'Westonbirt' FCC, RHS x Dante FCC, RHS A much-respected stud, the awarded Dante is free flowering, each spike producing 14 to 22 spreading, well-formed pinks. Mated with the monarch of Cymbidium breeding, Alexandri 'Westonbirt', we are assured of first rate progeny, profusely productive of beautiful pinks and blush-whites of heavy substance.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6034 Alexandri 'Westonbirt' FCC, RHS x Fairy Princess An exceptionally fine diploid of Princess Astrid x Lyoth parentage, Fairy Princess is an energetic grower, copiously productive of large, shapely blooms of long-lasting substance. Combined with the superb qualities of Alexandri 'Westonbirt', lovely, expertly proportioned pinks of great substance are promised.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6042 Alexanderi 'Westonbirt' FCC, RHS x Candeur 'Dos Pueblos' Candeur exhibits the many qualities necessary in a good diploid stud. Exceptionally vigorous, it is a prolific provider of strong, long arching spikes, each carrying 25 to 30 large blooms. It is rare for a diploid to produce such a quantity of flowers of as fine form and substance as does Candeur 'Dos Pueblos'. Combined with the many fine features of the famed 'Westonbirt' parent, we are guaranteed A-1 progeny, exceedingly productive of top flight whites.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6044 FIREBIRD (Alexanderi 'Westonbirt' FCC, RHS x Edzell 'John Linford' AM, RHS) Clear tones of red, rose and pink will prevail in this remake of the well-known hybrid. Edzell 'John Linford' is well-loved for its radiant, shapely flowers of deep red. Vigorous and free flowering, each spike of this gay diploid bears from 14 to 20 handsome flowers.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6055 ALL CLEAR (Alexanderi 'Westonbirt' FCC, RHS x Clarissa 'Chelsea' AM, RHS) Of handsome, deep reddish-bronze coloration, Clarissa 'Chelsea' is a select clone, resulting from the mating of Carisbrook and Rio Rita. Very vigorous and exceedingly productive of full, handsomely proportioned flowers of heavy substance. The beautiful lip is widely margined with deep red. In this mating with the famed 'Westonbirt', we are striving for offspring highly productive of quality material in tones of rose to red.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6056 GOLDEN TURK (Alexanderi 'Westonbirt' FCC, RHS x Istanbul) An attractive, well-formed rich pink of heavy substance, Istanbul is a vigorous, prolific diploid of Ceres x Dante parentage. Combined with the tetraploid Alexanderi 'Westonbirt', progeny abundantly productive of first class, clear pinks may be expected.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6060 KATE BELL (Alexanderi 'Westonbirt' FCC, RHS x Remus 'Sunset' AM, RHS) This is a honey of a cross for those desiring heavy, full flowers of captivating tones of apricot, peach and copper. Spike habit is excellent - straight, sturdy and tall, laden with countless blooms. The broad, boldly marked lip of the excellently proportioned copper-rose Remus 'Sunset' may be expected to appear in many of the offspring.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6085 BALKIS (Alexanderi 'Westonbirt' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) For exhibition, breeding or top quality bloom sales, Balkis is second to none! For description of this fine hybrid, refer to page 7.

5"-6" pots \$12.50 and \$15; 7"-9" pots \$20 and \$30

6124 SUNBURST (Alexanderi 'Westonbirt' FCC, RHS x Golden Hinde) From 16 to 22 shapely, heavy flowers of clear, golden yellow are produced on the many flowering spikes yielded by the vigorous growing Golden Hinde. Combined with the extraordinary qualities of Alexanderi 'Westonbirt', we are anticipating robust, free flowering progeny, providing large flowers of delightful form and heavy substance. Clear, vibrant tones of yellow and pleasing colorations of cream and ivory to prevail.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

Babylon 'Carpentier'

Babylon 'Castle Hill'

FCC, RHS

'Castle Hill' and 'Carpentier' are celebrated tetraploid cultivars of Babylon. The former was used extensively in England and parented many fine seedlings before the Carpentier cultivar came into prominence.

Both cultivars produce sturdy, strong arching spikes, bearing cascades of fine pinks of handsome proportions and strong substance. Both bestow desirable traits for broad, boldly marked lips, large size, immense substance, high productivity and vigorous growth to their fortunate offspring.

Hybrids of Babylon 'Castle Hill' include Featherhill, Vieux Rose, Carillon, Colina, Ann Green and the multi-colored crosses of Tinsel and Chapala. Offspring of Babylon 'Carpentier' include Crescendo, Fantasia and the beloved remakes of Tinsel and Ann Green.

BABYLON 'CASTLE HILL' FCC, RHS

4036 ANN GREEN (Rosanna 'Pinkie' FCC, RHS x Babylon 'Castle Hill' FCC, RHS) Cascades of pink tetraploids of wondrous form and superb substance are forthcoming from this combination. For description of this magnificent hybrid, refer to cross 6121 on page 7.

10"-14" tubs, \$25, \$35 and \$50

5077 TINSEL (Babylon 'Castle Hill' FCC, RHS x Pearl 'magnificum' FCC, RHS) Gala shades of copper, pink, green and even yellow, along with interesting polychromes are forthcoming from this world celebrated hybrid. A tetraploid x tetraploid combination involving two exceptionally vigorous, highly productive studs, both well-known for their massive array of well-proportioned, heavy blooms produced on strong, towering stalks. Marmie Kingsford, Rio Rita, Lump O'Gold, Bayport, Royal Duke and Sussex Pearl are but a limited few of Pearl 'mag's' famed progeny.

10"-14" tubs, \$25 and \$35

5078 BALI (Sussex 'Carmine' AM, RHS x Babylon 'Castle Hill' FCC, RHS) Lofty, arching spikes bearing a multitude of flowers having handsome, colorful lips may be expected of this repeat cross. Because of the clarity of color and superiority of the vivid, orange-bronze Sussex 'Carmine', we anticipate triploid progeny excelling the original strain of Bali. Both parents are noted for exceptional vigor, high flower production and attractive, heavily margined lips. Tones of copper, yellow and pink to predominate.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

5088 ANN GREEN (Babylon 'Carpentier' x Rosanna 'Pinkie' FCC, RHS) Exquisite tetraploid pinks are provided by this fine cross. For description of this exceptional hybrid, refer to cross 6121 on page 7.

7"-9" pots, \$20 and \$30; 10"-14" tubs, \$25, \$35 and \$50

ANN GREEN 'PINK SPLENDOR'

HCC, AOS; HCC, ODC. Crosses 4036, 5088 and 6121.

5095 DESIREE A'LOGANN (Babylon 'Carpentier' x Balkis 'Perfection') Lovely tetraploids are produced in profusion by this splendid cross. For description of this fine hybrid, refer to page 10.
7"-9" pots, \$15 and \$20; 10"-14" tubs \$25 and \$35

5117 COLINA (Nam Khan 'Extra Fine' x Babylon 'Castle Hill' FCC, RHS) Product of two fine tetraploids, robust, highly productive pinks of quality form and ultraheavy substance are assured. Both parents are noted for extreme vigorousness and abundant production of superior material borne on strong, arching spikes.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6035 REGINALD NICHOLL (Babylon 'Castle Hill' FCC, RHS x Fairy Princess) An energetic diploid, Fairy Princess is a copious provider of large, heavy pinks of handsome conformation. In collaboration with the fabulous growth, productivity and substance characteristic of Babylon 'Castle Hill', vigorous offspring yielding multitudes of delightful pinks of varying tones may be expected.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6036 Babylon 'Castle Hill' FCC, RHS x Doris Aurea 'Sunset' Copper, apricot, bronze, rose, polychromes - a variety of colors may be anticipated from this mating. Boldly marked lips further enhance the lively coloration of the sepals and petals of the offspring. Doris Aurea 'Sunset' is a robust diploid of good spike habit, carrying 15 to 20 shapely, copper-bronze flowers on long, arching spikes.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6037 Babylon 'Castle Hill' FCC, RHS x Rosinante AM, RHS Rosinante is vigorous and productive of many spikes, each bearing from 16 to 18 large, clear pink diploid blooms of triploid-like form and substance. Beautiful pinks of wonderful conformation and strong substance will dominate in this combination. The off-

spring will be vigorous growers, producing tall, sturdy spikes carrying a magnificent array of blooms.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6052 Babylon 'Castle Hill' FCC, RHS x Candeur 'Dos Pueblos' How productive can a hybrid be? Our very, very productive Candeur 'Dos Pueblos' is an exceptionally vigorous diploid, highly creative of strong, arching spikes, each laden with 25 or more large whites of triploid-like form and substance. Combined with the fine traits of 'Castle Hill', robust triploids exuberantly productive of quality pinks ranging in color from soft tints to shades of rose are awaited.

5"-6" pots, \$10 and \$12.50; 7"-9" pots, \$15 and \$20

6053 Babylon 'Castle Hill' FCC, RHS x Edzell 'John Linford' AM, RHS Attractive colorations of rose to red may be expected of this hybrid. Edzell 'John Linford' is well loved for its fascinating flowers of deep red. Vigorous and free flowering, each spike of this gay diploid bears from 14 to 20 handsome, heavy blooms. Combined with the many favorable traits of 'Castle Hill', vigorousness, abundant production and quality are assured.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6054 Babylon 'Castle Hill' FCC, RHS x Clarissa 'Chelsea' AM, RHS Again we have combined two robust, very productive parents. Clarissa 'Chelsea' has lovely, deep reddish-bronze sepals and petals and a large lip which is boldly margined with deep red. Choice colorations of rose, bronze and red to result from this mating.

5"-6" pots, \$8.50 and \$10; 7"-9" pots, \$12.50 and \$15

6121 ANN GREEN (Babylon 'Castle Hill' FCC, RHS x Rosanna 'Pinkie' FCC, RHS) Great expectations are in order for this repeat tetraploid x tetraploid combination. For description of this exceptional hybrid, refer to page 7.

5"-6" pots, \$12.50 and \$15; 7"-9" pots, \$20 and \$30

Inquiries and Orders

Inquiries are Invited. With over twenty acres devoted to the hybridization and culture of fine orchids, it is difficult to list all of the plants which are available for purchase. If you are interested in obtaining Cymbidiums not included in this catalog, please let us know so that additional literature may be sent for your consideration. We also welcome your inquiries on Cattleyas, Phalaenopsis and Cypripediums.

All Orders, Small or Large, Receive Individual Attention. Complete Satisfaction is Guaranteed.

Should You Wish Assistance in the Selection of Plant Material, kindly advise the genera - Cymbidium, Cattleya, Phalaenopsis or Cypripedium - of orchids desired, as well as, color preference, price range and pot sizes, and we will be most happy to make an excellent selection for you.

Safe Arrival and Economy are considered in determining the mode of delivery. Parcel post, air parcel post, bus, motor freight, railway express, air express and air freight are among the methods employed. The majority of orders sent out of California are shipped by rail, transportation charges collect. Unless otherwise requested, plants other than those in tubs, will be sent in paper pots or

polyethylene so as to defray transportation costs. There is no packing charge.

Until your credit is established, payment should accompany your order. California purchasers are required by law to add four percent sales tax unless a resale certificate is on file.

The Experienced Personnel at Dos Pueblos are at YOUR Service!

Orders from Hawaii should include an import permit secured from the Board of Commissioners of Agriculture and Forestry in Honolulu.

Dos Pueblos Orchids are Shipped Throughout the World. Foreign shipments are customarily sent bare root via air parcel post or air freight, depending upon the size, weight and carrier facilities within the various countries. Shipments to Canada are often made via parcel post or railway express. Inquiry should be made with the local plant quarantine station in your area regarding possible requirements pertaining to importation of orchid plants and the necessity of obtaining an import permit.

EXCELLENT PLANT MATERIAL, SAFE DELIVERY AND YOUR COMPLETE SATISFACTION ARE GUARANTEED

May we hear from you soon?

SAMUEL B. MOSHER, President and General Manager

P.O. BOX 158, GOLETA, CALIFORNIA
